UI/UX designer with background in design, research and education. Before becoming a UI/UX designer, I worked as an information management specialist at the National Center for Suicide Prevention. I discovered my passion for product design while assisting clients in resolving platform problems. Later, I work in an industrial networking company's IIoT department to design complex and cross-platform systems. As a designer, I enjoy solving complex problems through the design process and continue to improve my abilities by joining a reading club and keeping up with design trends.

EXPERIENCE

UI/UX Designer
Jun 2021 - Now
